

I'm using HummingBird WP plugin

Make sure "Cache URL queries" **turned off**

Settings

Fine tune page caching to work how you want it to.

Include logged in users

Caching pages for logged in users can reduce load on your server, but can cause strange behavior with some themes/plugins.

Cache URL queries

You can turn on caching pages with GET parameters (?x=y at the end of a url), though generally this isn't a good idea if those pages are dynamic.

end exclude the following COOKIES and all the custom parameters created by you.

Cookies

Exclude specific cookies by entering their IDs in this field.

Cookies

Specify the cookie IDs you don't want cached. Add one ID per line.

wp_woocommerce_session_
