# I'm using LiteSpeed caching plugin

If you are using the LiteSpeed caching plugin, you should do the following settings in your WP to effectively capture UTMs.

## Go to Settings

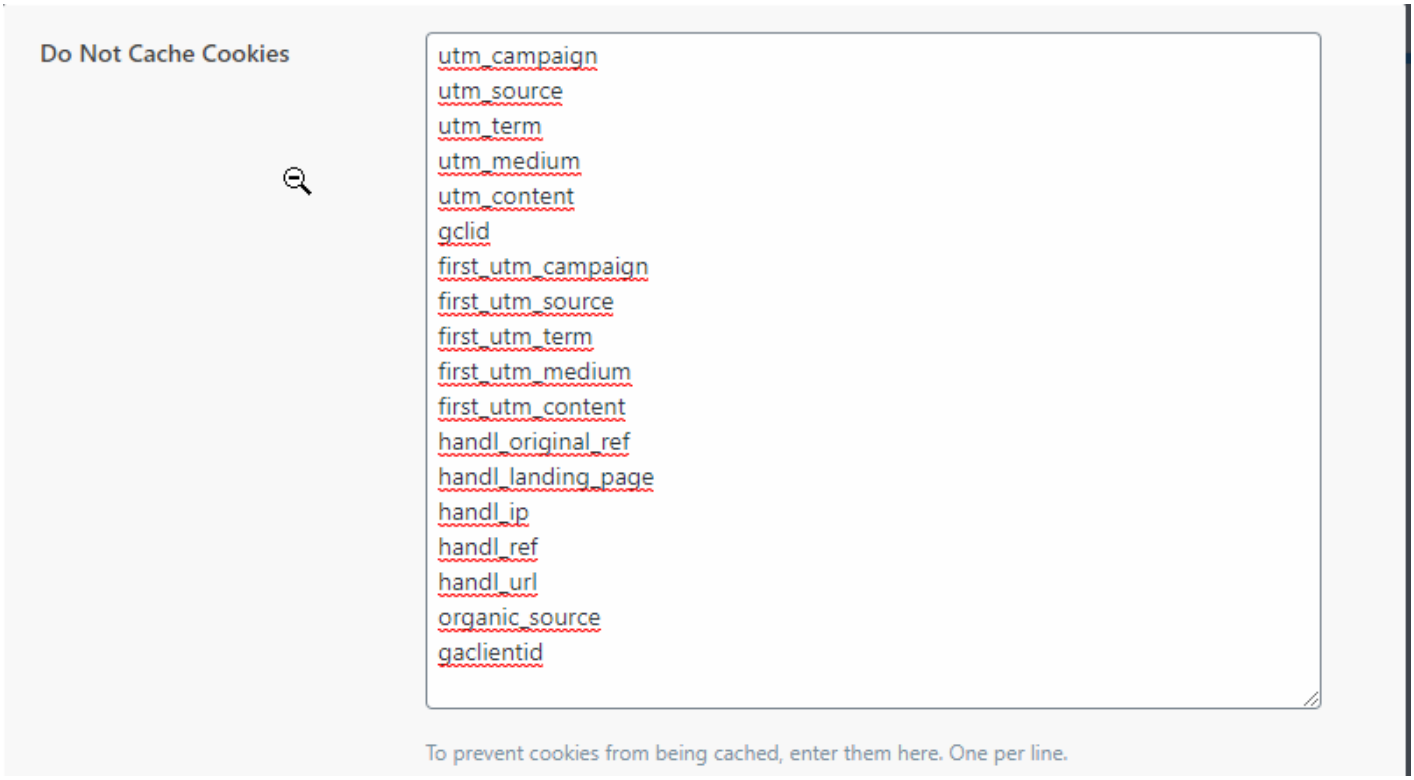

# Copy the list below and add it in "Do not cache cookies" field

**COOKIES**

```
utm_campaign
utm_source
utm_term
utm_medium
utm_content
gclid
first_utm_campaign
first_utm_source
first_utm_term
first_utm_medium
first_utm_content
handl_original_ref
handl_landing_page
handl_ip
handl_ref
handl_url
organic_source
gaclientid
//and all the custom parameters created by you
```

# Copy the list below and add it in "Do not cache query strings" field

**QUERY ARGS**

```
utm_campaign
utm_source
utm_term
utm_medium
utm_content
gclid
//and all the custom queries you are capturing
```

That's it. You are ready to go collecting UTMs :)
