

# I'm using WP Fastest Cache

## Exclude COOKIES

In order for HandL UTM Grabber to work more efficiently, you may want to whitelist some of the COOKIES our plugin uses so they are not cached.

You can do so very easily following the steps

1. Go to the settings for the WP Fastest Cache plugin
2. Click on the "Exclude" tab.
3. Click the "Add New Rule" button associated with "Exclude Cookies"
4. Type the cookie name you use from [Native WP Shortcodes](#) in the text box.
5. Click "Save".

The screenshot shows the WP Fastest Cache Options page with the 'Exclude' tab selected. The 'Exclude Cookies' section is active, and an 'Exclude Page Wizard' modal is open. The modal shows a rule for 'utm\_source' with the condition 'Contains' and the value 'utm\_source'. The modal has 'Close' and 'Save' buttons.

WP Fastest Cache Options

Settings Delete Cache Image Optimization Premium Exclude CDN DB (179)

**Exclude Pages** Add New Rule

Is Equal To: wp-login.php  
https://handl-sandbox/wp-login.php

Start With: wp-admin  
https://handl-sandbox/wp-admin(.\*)
