

# I'm using WP Fastest Cache

## Exclude COOKIES

In order for HandL UTM Grabber to work more efficiently, you may want to whitelist some of the COOKIES our plugin uses so they are not cached.

You can do so very easily following the steps

1. Go to the settings for the WP Fastest Cache plugin
2. Click on the "Exclude" tab.
3. Click the "Add New Rule" button associated with "Exclude Cookies"
4. Type the cookie name you use from [Native WP Shortcodes](#) in the text box.
5. Click "Save".

The screenshot shows the WP Fastest Cache Options page with the 'Exclude' tab selected. The page has a sidebar with various WordPress settings and a main content area with tabs for Settings, Delete Cache, Image Optimization, Premium, Exclude, CDN, and DB (179). The 'Exclude' tab is active, showing sections for Exclude Pages, Exclude User-Agents, Exclude Cookies, Exclude CSS, and Exclude JS. Each section has an 'Add New Rule' button. The 'Exclude Cookies' section is currently empty. An 'Exclude Page Wizard' modal is open, showing a form to add a new rule. The form has a dropdown menu set to 'Contains' and a text input field containing 'utm\_source'. There are 'Close' and 'Save' buttons at the bottom of the modal.
