No License Key Field Appears in WP Admin > Plugins

When you click "License" and no license field appears, or if you see the console log print a "javascript:void()" error message, follow these steps in your browser to make the field visible:

1. Navigate to WP Admin > Plugins > HandL UTM Grabber v3.
2. Right-click on "License" and select "Inspect Element."
3. Once you are there, locate the class shown in the image and remove "display: none."
4. This action will make the license field appear.
