

HandL GCLID Reporter

GCLID, short for Google Click Identifier, is a **unique and hihgly encrypted tracking parameter** that Google uses internally to transfer information between your Google Ads account and your Google Analytics account. As you know, **GCLID is not directly available in Google Ads, so it isn't possible to associate GCLID data with the users/campaign/location in Google Ads.**

HandL UTM Grabber allows tracking GCLID throughout the conversion. With the GCLID collected and GCLID reporter, now you can **create daily report associating every single GCLID to your campaign, ads groups and even to the level of ads creative.** You can also see which location GCLID is associated, and if it is search ads, you can see the exact (or phrase) **keywords** used for corresponding GCLID value. In addition to that, you'll see the **placement, click type (engagement or headline), device, ads network and more.**
