

Contact Form 7 UTM Tracking (Legacy)

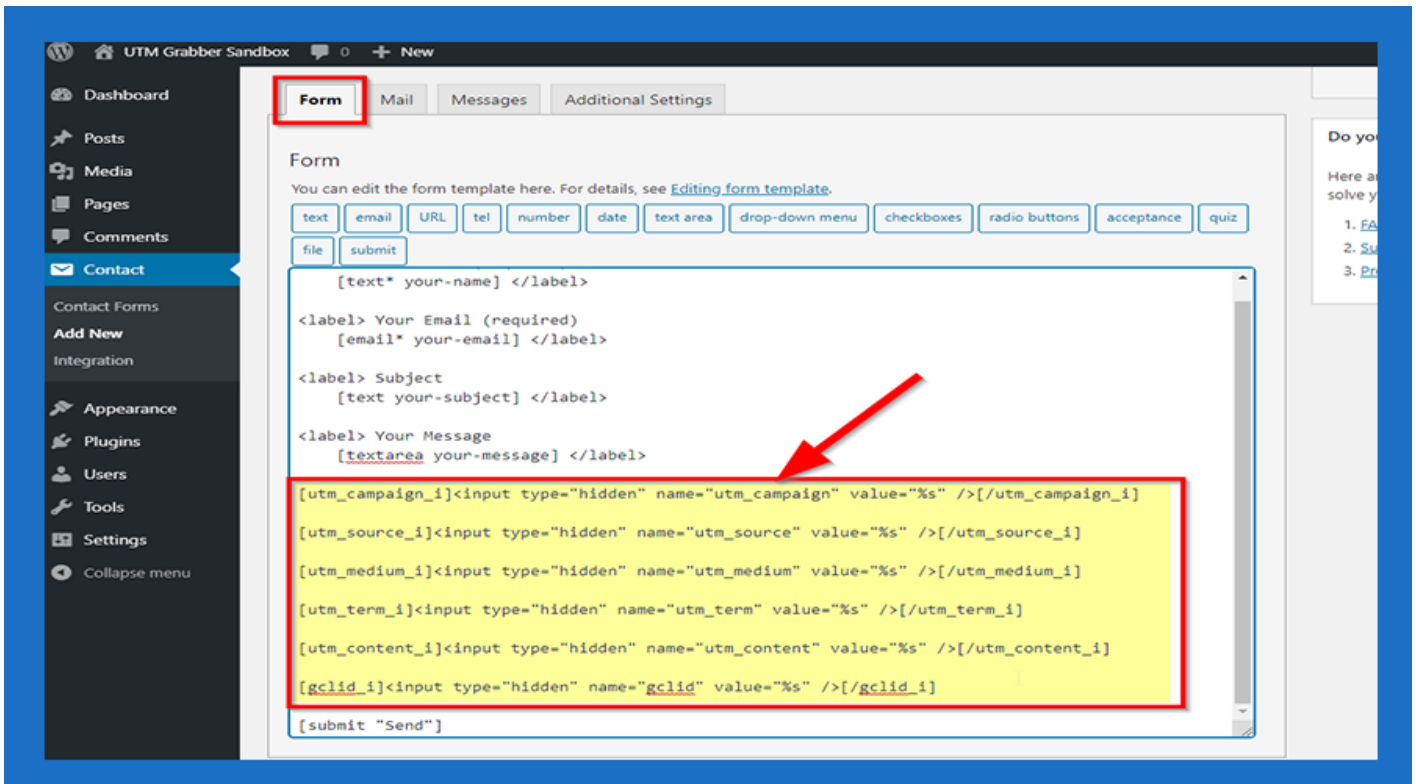

1. Click Contact And Add New

The screenshot shows the WordPress dashboard interface. On the left sidebar, the 'Contact' menu item is highlighted with a red box. In the main content area, the 'Contact Forms' section has an 'Add New' button highlighted with a red box, and a red arrow points to it. Below the 'Add New' button, there are two informational panels: 'Getting spammed? You have protection.' and 'Before you cry over spilt mail...'. At the bottom, there is a table of existing contact forms.

6. Click 'Pages' and then click the 'Add New' button

7. Paste the code you copied

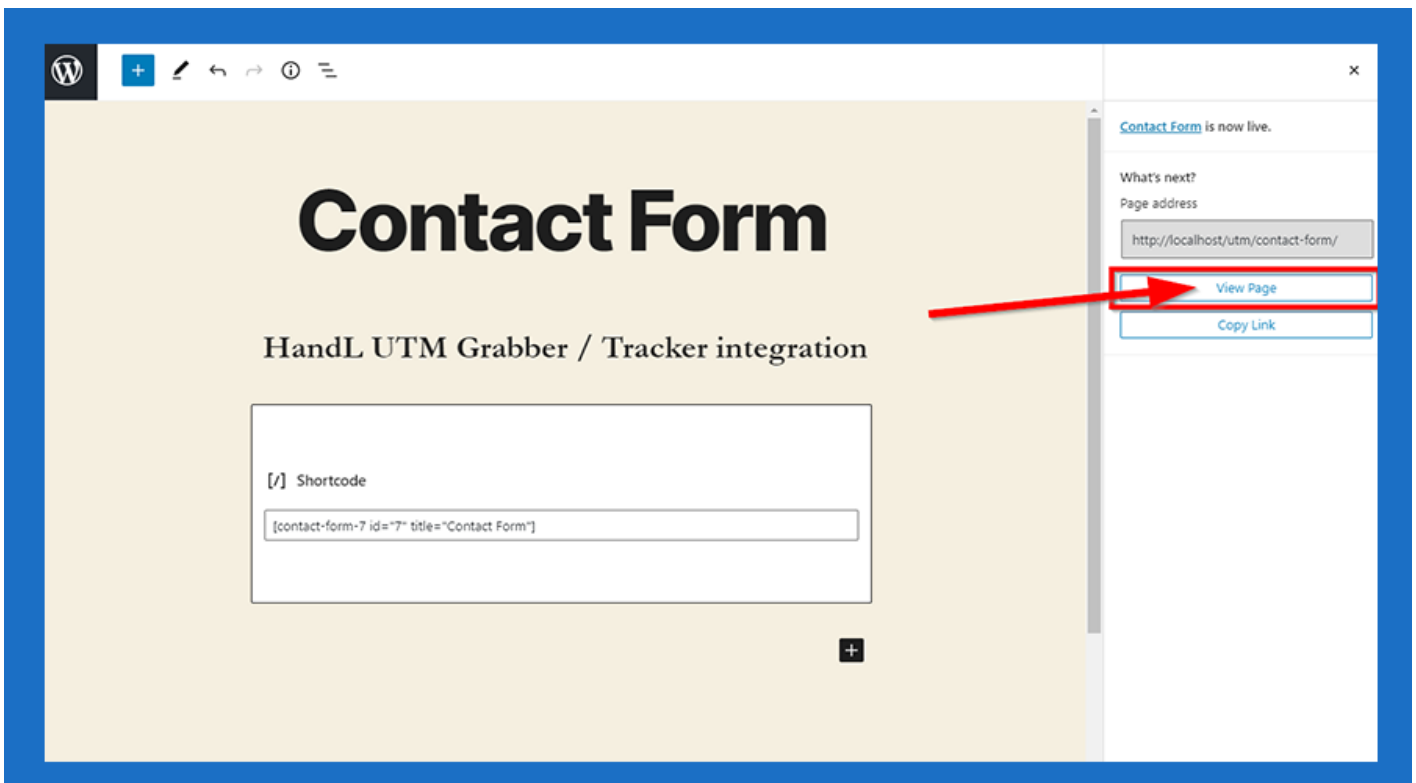

8. Click the 'Publish' Button

The screenshot shows the WordPress editor interface for a page titled "Contact Form". The page content includes the title "Contact Form", the subtitle "HandL UTM Grabber / Tracker integration", and a shortcode block containing the code `[contact-form-7 id="7" title="Contact Form"]`. In the top right corner, the "Publish" button is highlighted with a red box, and a red arrow points to it from the left. The right sidebar shows the "Status & visibility" section with "Visibility" set to "Public" and "Publish" set to "Immediately".

9. Click 'View Page' Button

The screenshot shows the same WordPress editor interface as in the previous step. The page content is identical. In the right sidebar, the "What's next?" section is visible, showing the page address `http://localhost/utm/contact-form/`. The "View Page" button is highlighted with a red box, and a red arrow points to it from the left.
