

Contact Form 7 UTM Tracking

1. Click Contact And Add New

The screenshot shows the WordPress dashboard with the 'Contact' menu item highlighted in the sidebar. The 'Contact Forms' section is active, and the 'Add New' button is highlighted in the top right corner. A red arrow points to the 'Add New' button.

Getting spammed? You have protection.

Spammers target everything; your contact forms aren't an exception. Before you get spammed, protect your contact forms with the powerful anti-spam features Contact Form 7 provides.

Contact Form 7 supports spam-filtering with [Akismet](#). Intelligent [reCAPTCHA](#) blocks annoying spambots. Plus, using [comment blacklist](#) you can block messages containing specified keywords or those sent from specified IP addresses.

Before you cry over spilt mail...

Contact Form 7 doesn't store submitted messages anywhere. The important messages forever if your mail server has issues or you configuration.

Install a message storage plugin before this happens to you. [Flamingo](#) is a free WordPress plugin that stores messages through contact forms into the database. Flamingo is a free WordPress plugin that stores messages through contact forms into the database.

<input type="checkbox"/> Title	Shortcode	Author
