# ActiveCampaign hidden fields to appear in Elementor Form

By default Elementor doesn't list to map hdden fields in Elementor Form

You can't map your form field to a hidden field in Elementor...

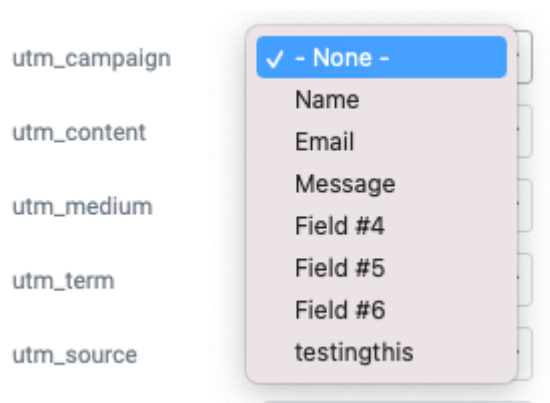

You can resolve this in two ways

1. change all the custom parameters from ActiveCampaign to text from hidden. They will immediately will be mappable.
2. edit elementor code (single line edit) wp-content/plugins/elementor-pro/modules/forms/classes/activecampaign-handler.php:131. Add hidden => 'text' as shown in the image.

```
117
118    private function normalize_type( $type ) {
119        static $types = [
120            'text' => 'text',
121            'number' => 'number',
122            'address' => 'text',
123            'phone' => 'text',
124            'date' => 'text',
125            'url' => 'url',
126            'imageurl' => 'url',
127            'radio' => 'radio',
128            'dropdown' => 'select',
129            'birthday' => 'text',
130            'zip' => 'text',
131            'hidden' => 'text'
132        ];
133
```

After you are done either of those, you will be able to map the fields just fine (see the image)...

utm_campaign	✓ - None -
utm_content	Name
	Email
utm_medium	Message
	Field #4
utm_term	Field #5
	Field #6
utm_source	testingthis
