

# JotForm UTM tracking via iframe embed

HandL UTM Grabber V3 integrates with JotForm very easily.

After defining the variables in the form similar to the one below picture.

The screenshot displays the JotForm Form Builder interface. The top navigation bar includes the JotForm logo, 'Form Builder', and tabs for 'BUILD', 'SETTINGS', and 'PUBLISH'. The 'BUILD' tab is active. On the left, a 'Form Elements' sidebar lists various widgets like Header, Full Name, Email, Address, Phone, Date Picker, Appointment, Signature, Fill in the Blank, Product List, Short Text, Long Text, Paragraph, Dropdown, Single Choice, and Multiple Choice. The central workspace shows a form titled 'Form' with an email field (placeholder: example@example.com), three text input fields (each with a 'Type a question' label), and a green 'Submit' button. The right sidebar contains settings for the selected field, including 'Hover Text', 'Default Value', 'Read-only' (OFF), 'Shrink' (OFF), 'Hide field' (OFF), and 'Field Details' (Unique Name: { utm\_campaign | }).

Copy paste the embed code from JotForm to your WordPress

It will be something like this: simply copy and paste this into your WordPress editor or page builder.

```
<iframe id="JotFormIFrame-YOURJOTFORMID" title="Form" onload="window.parent.scrollTo(0,0)" allowtransparency="true" allow="geolocation; microphone; camera; fullscreen" src="https://form.jotform.com/202977053711051" frameborder="0" style="min-width:100%;max-width:100%;height:539px;border:none;" scrolling="no" > </iframe> <script src='https://form.jotform.com/s/umd/latest/for-form-embed-handler.js'></script> <script>window.jotformEmbedHandler("iframe[id='JotFormIFrame-YOURJOTFORMID'", "https://form.jotform.com/");</script>
```

After this code, copy and paste the code below. Ensure you replace `YOURJOTFORMID` with your form ID (as shown above).

```
<script>
setTimeout(() => {
  if (typeof(utms_js) == 'object'){
    var ifr =
document.querySelector("iframe[id='JotFormIFrame-YOURJOTFORMID'")
    var iframeParams = [];
    iframeParams.push( jQuery.param(utms_js) )
    var src = ifr.src;
    ifr.src = src + "?" + iframeParams.join('&');
  }
}, "500");
</script>
```
