

Collecting UTMs in Piotnet

Assign custom classes for each field as it is shown above. Here we show only for `utm_campaign`, however this can be implemented for all the fields similarly.

Please see the list of parameters you can use here [Native WP Shortcodes](#)

The image shows a mobile interface for 'Piotnet Forms' with the 'Advanced' settings tab selected. The 'Advanced' section is expanded to show 'Margin' and 'Padding' settings, each with a 'PX' input field and a link icon. Below these are 'Box Shadow' (with a pencil icon), 'Custom ID' (empty input), and 'Custom Classes' (input containing 'utm_campaign'). At the bottom, there are sections for 'Border' and 'Background', both with dropdown arrows.
