HandL UTM Grabber / Tracker How to collect and track UTM variables via Spiffy step by step

- [Spiffy Checkout Integration](#)

# Spiffy Checkout Integration

Spiffy Checkout integration is very easy.

As long as you can pass UTMs to the checkout URL, Spiffy can take them and record automatically as it is explained here <https://help.spiffy.co/article/251-adding-utm-parameters>.

So how can you append all the UTM variables to checkout URL.

It is very easy, simply create your anchor link and add `utm-out` class variable.

```
<a href="https://domain.spiffy.co/checkout/test" class="utm-out" />
```

You can view the UTMs in the Spiffy.

A screenshot of the Spiffy interface showing UTM tracking data. It features a list of items with icons: a Chrome icon, an Apple icon, a link icon, and a target icon. Below these are campaign details including 'Campaign: 123', 'Source: google', 'Medium: cpc', 'Content: content', and 'Term: term'.

Chrome  
OS X 10.15.7  
Linked   
151.210.164.86

 **Campaign:** 123  
**Source:** google  
**Medium:** cpc  
**Content:** content  
**Term:** term

You can pass UTMs using the integrations as well such as Zapier.
