WooCommerce to Facebook Conversion API (FB CAPI) [Deprecated as of 3.1]

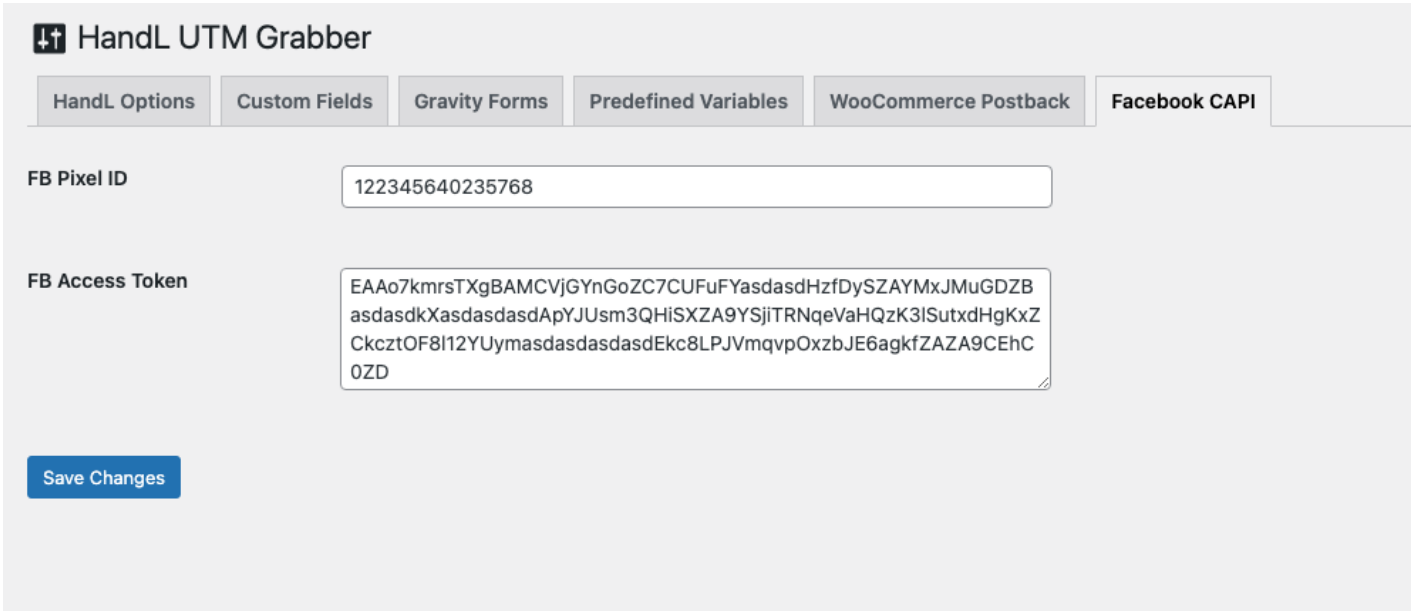

Deprecated as of v3.1 (See details)

Go to UTM > WooCommerce Postback and select Facebook Ads

You don't need any other change here...

Click Facebook CAPI menu in UTM and enter Facebook pixel id and access token

How to generate Access Token: Go to your pixel, click Settings, scroll down to the Conversion API and click Generate Access Token.

HandL UTM Grabber Ads Acc's Pixel

Overview | Test Events | Diagnostics | History | **Settings**

Use information your customers have provided to your business, like email address or phone number, to match your website's visitors to people on Facebook. This can help you attribute more conversions to your Facebook ads and reach more people through remarketing campaigns. Learn More

Show Options

Event Setup

View the events currently setup. To add or edit events directly without changing your website code, use the Event Setup Tool.

Open Event Setup Tool

Track Events Automatically Without Code OFF

Your Facebook Pixel can find and report on valuable website events, such as purchases or registrations, based on your site traffic, button text and page metadata. This feature can help you set up events without having to install code. You can choose to turn this functionality on or off. Learn More.

Conversions API

Send web events directly from your server. Learn More

Set up manually

You can set up the Conversions API by following our step-by-step guide.

Get Started

Generate access token

Set up through a partner integration

Easily connect your web activity through a partner integration - no coding required. Choose from Wordpress, Tealium, Segment and more.

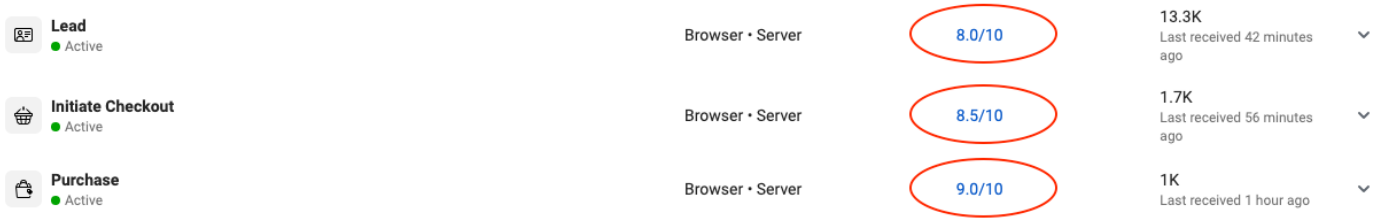

Choose a Partner

Traffic Permissions

Use a block list or an allow list to control if domains are allowed to send Facebook events through your pixel. We suggest using an allow list because it helps ensure that your pixel isn't used to send events through domains you haven't authorized. Learn More

Allow list: Only domains added to the allow list can send events to Facebook through this pixel. Domains not on the allow list will be blocked from sending events.
Block list: Only domains added to the block list will be blocked from sending events to Facebook through this pixel. Domains not on the block list will be allowed to send events.

Once you set it up everything, keep monitoring your events and watch your event match increases to high 8-9s.
