HandL UTM Grabber / Tracker with WPEverest Forms Integration

- [UTM Tracking in WPEverest](#)

UTM Tracking in WPEverest

Create a hidden field And assign CSS name matching with our naming convention [here](#)

The screenshot displays the WPEverest form builder interface. The top navigation bar includes icons for Fields, Settings, Integrations, and Payments, along with a form ID "[everest_form id='1485']" and buttons for Preview, Embed, and SAVE.

The left sidebar contains two tabs: "Add Fields" and "Field Options". Under "Add Fields", there are sections for:

- Label**: A text input field containing "utm_source".
- Meta Key**: A text input field containing "utm_source".
- Default Value**: A text input field with a placeholder "<>".
- CSS Classes**: A text input field containing "utm_source".

The main form area shows the following fields:

- Email ***: A text input field.
- Telefonnummer ***: A text input field.
- Dato ***: A date picker field with the placeholder "Klik her for at vælge dato".
- Tidspunkt ***: A time picker field.
- Betingelser & Vilkår ***: A checkbox field with the text "Jeg acceptere hermed med at blive ringet op af Fjernvirus partner på det valgte tidspunkt."
- Hidden Field**: A text input field containing "Fjernvirus.dk".
- utm_source**: A text input field with a dropdown menu icon.

A large dashed box with a plus sign is visible on the right side of the form area. At the bottom right, there is a button labeled "Add Row".
